WORK EXPERIENCE

Practicum by Yandex

📅 10/2019 - Ongoing
🔗 https://github.com/tychtych

While working in Practicum by Yandex I have developed 4 projects together with a team.

- Implemented UI using HTML5, CSS, SCSS and Vanilla Javascript
- Wrote integration tests using Selenium (WebdriverIO) and Mocha

Project "Cancer is treatable"

🔗 https://github.com/feuerfrie1/rak-lechitsa

Building a clone website for the non-profit organization about inspiring stories of people who has defeated cancer.

- Used technologies: Vue.js, Nuxt.js, Git, Prettier
- Have used Strapi as a CMS tool

Project "Place"

🔗 https://github.com/tychtych/Place

A user blog to upload favorite places with images and names to save the best life moments. The user can edit his name and occupation, as well as add new places as he explores the world. Documented bug reports and had a pair check code review for further improvements.

- Used technologies: HTML5, CSS, Vanilla JavaScript, REST, Git

Project "From-Portland-to-Portland"

🔗 https://github.com/tychtych/From-Portland-to-Portland

A traveling guide leading the user to explore more highlights about an epic bicycle journey from Portland, ME. to Portland, OR. Collaborated with designers on implementing responsive design elements on the webpage.

Project "Learning How to Learn"

🔗 https://github.com/tychtych/Learning_To_Learn-Project

An educational landing page with multiple sections about various methods to obtain new skills. Brought mockups to life with the final result of a responsive web page and CSS animation.

TOOLBOX

Technologies

HTML5	CSS	SCSS	BEM

Bootstrap	JavaScript	Vue.js

Nuxt.js	Webpack	Git	WCAG

WebdriverIO	Mocha	REST	Strapi

React

Soft Skills

Problem solving	Negotiation

Multitasking	Self-driven

Detail-oriented

EDUCATION

Front End Developer Specialization

Practicum by Yandex

📅 10/2019 - Ongoing

BA Linguistics

Saratov State University
